

Jacob Slojkowski

Data Analyst & Developer

Profile

An individual fluent in both Polish and English with a strong background in Data Analysis, Development and Transport Management, I bring a diverse and robust skill set that includes Data-Driven planning, Maintaining and innovating processes and finding creative solutions. I thrive under high-pressure scenarios and possess practical expertise in working with raw data, and displaying it via interactive reports using Power BI, SQL and other tools. I am always looking for ways to implement improvements through careful data analysis.

Employment History

Data Analyst at pladis, Ashby-de-la-Zouch Hybrid.

June 2022 — May 2024

Data Analyst

- Transitioned to Data Analyst, where I analysed raw data and utilised Power BI, Excel and SQL to deliver actionable insights.
- Developed and implemented data-driven Power BI, Excel Reports and strategies that significantly improved company KPI's such as Deliveries on Time, Reduced empty millage, and improved Trailer space utilisation.
- Attended executive meetings to report on Business Performances and guided the business during decision-making

Transport Coordinator

- Managed a fleet of 150 drivers, serving as the primary contact for drivers and customers.
- Oversaw and streamlined country-wide transportation operations, enhancing efficiency, customer satisfaction, fleet utilisation and a variety of other KPI's by carefully studying available data and acting on it.

Freelance Developer and Data Analyst at Pretty Estimate LTD, London, Remote.

June 2023 — May 2024

- Developed and maintained web applications for a startup offering B2B services in the field of automatic quotations.
- Leveraged technologies including React, Next.js, Redux, and Tailwind to create efficient and scalable solutions.
- Successfully delivered high-quality projects that enhanced the startup's service offerings and user experience, contributing to its growth and market competitiveness.

Fleet Management and Process Optimisation at Manheim Vehicle Services, Leicester - On Site.

- Directed the management of a fleet of demonstration and event vehicles for Jaguar & Land Rover.
- Developed and implemented a comprehensive vehicle preparation process for high-profile events such as Wimbledon and renowned horse races.
- Led a team to execute a rapid turnaround process, ensuring seamless efficiency and coordination among multiple staff members.
- Created dashboards and reports for the purposes of reporting and data-driven decision making.

★ About me

After completing a degree in international business management, my fascination with optimising and enhancing business performance led me to pursue a Master's degree in Data Analysis. With valuable job experience under my belt, I am now dedicated to advancing as a full-time data analyst. I thrive in high-pressure environments, relishing the opportunity to analyse numbers, discern patterns, and transform insights into actionable goals through interactive reports. Over the course of my career, I have successfully implemented numerous data-driven processes. Recently relocating to Poland, I am eagerly seeking a new professional challenge. Currently specialising in Power BI, I am also enhancing my skills through courses to become proficient in SQL.
